## Government Finance Statistics January 2021 (Preliminary data)

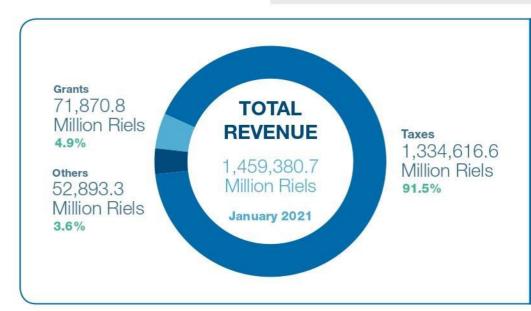

## **BUDGET LAW 2021**

REVENUE

20,526,394 Million Riels

**EXPENDITURE** 

27,265,898 Million Riels In the fiscal year of 2021, the Cambodia economy is expected to achieve a projected growth rate at around 4%, contributed by the industrial, service and agriculture sector. As the COVID-19 pandemic continues, the Budget Law of 2021 was designed with the means to effectively mobilize the resources to sustain the implementation of the state budget.

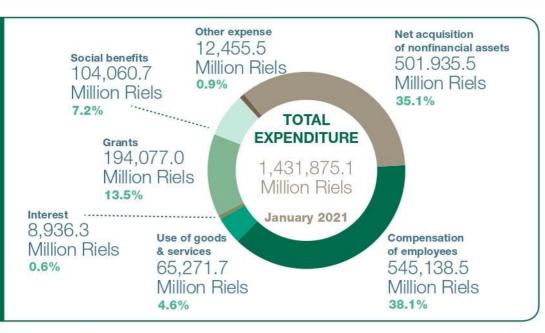

In January 2021, the revenue performance of the Budgetary Central Government (BCG) has achieved **7.11**% of the budget law, which decreased by **17.19**%, compared to January 2020.

The decline was due to declining of economic activity amid the COVID-19 pandemic, the exemption of monthly taxes for tourists/tourism industry and the minimum tax collection from aviation industry among others.

In January 2021, the expenditure performance of the BCG has achieved 5.25% of the budget law, which increased by 28.50%, compared to January 2020.

To address the impact of the COVID-19 pandemic, the government has executed a proactive targeted-expenditure on sectors such as health, social assistance, and the economic.

Due to the effective management and utilization of assets and liabilities, the Royal Government of Cambodia has maintained its stable financial management amid the COVID-19 pandemic.
